Oxygenics Showerheads Are The Hospitality Showerhead Of The Future

This year at the Hospitality Industry Technology Exposition & Conference (HITEC) a prototypical hotel room from the future called 'Guest Room 2010' was showcased. The room featured products that are technologically advanced and eco-friendly which will benefit the hospitality industry in the future.

Oxygenics showerheads were one of the many products showcased in the 'Guest Room 2010'. Oxygenics showerheads were chosen because they are eco-friendly, water and energy saving, guest pleasing and built to last - a combination guaranteed to be around far into the future.

Resort Spa is the world's first self-pressurizing shower fixture that uses patented fluidic technology to generate a full-power spray, even with water pressure as low as 20 psi. Guests can enjoy an invigorating full-spray shower, while using up to 70 percent less water. The shower head, with its elegant, simple design, has no moving parts and is easy to install. Crafted of brass with chrome accents and 24K gold plating, it resists corrosion and scale buildup.

Luminous Skyceilings™

The Sky Factory

PO Box 1177
 Fairfield, IA 52556
 (641) 472-1747
 info@theskyfactory.com
 www.theskyfactory.com

Luminous SkyCeilings are virtual skylights featuring authentic illusions of the sky, which elicit psycho-physiological relaxation responses in the observer and transform enclosed spaces into daylight-like environments. The SkyCeilings system includes modular translucent panels, compatible with all ceiling grid systems, and a choice of energy-efficient T-5, 6500K full-spectrum florescent lighting or 6000K patent-pending RFFreeLux LEDs. Patent-pending "elevators" and high-resolution photography give a three-dimensional appearance, creating the illusion of real skylights. SkyCeilings are available in rectangular, circular and elliptical shapes, and also as a sealed ceiling. SkyCeilings meet stringent requirements for radio frequency interference-free environments.
