New Oxygenics® TriSpa™ Showerheads Now Sold in Bed Bath and Beyond Stores Nationwide

Modesto, California – August 9, 2007 – Now, it's easier than ever get your hands on your very own Oxygenics TriSpa showerhead! In one of the most exciting developments of the year, ETL® is proud to announce that the TriSpa series is now available in all Bed Bath and Beyond stores nationwide and online at www.bedbathandbeyond.com.

Oxygenics showerheads combine numerous features designed to use less water while infusing the water with rich oxygen, and the new TriSpa series is no exception. The TriSpa is the first multi-function showerhead from Oxygenics and incorporates the patented smart technology Oxygenics showerheads are known for into an all-new revolutionized multi-spray showerhead. It offers THREE pressurized spray patterns for a dynamic and luxurious shower experience.

The Oxygenics line of showerheads are known for providing a refreshing, invigorating shower – all while saving valuable water and energy. They have been wildly successful in catalogues, stores, and homes worldwide for over 25 years. Oxygenics patented technology reduces the rate of water flow while maintaining pressure and producing a pleasurable spa-like shower. Additionally, by utilizing a solid Delrin core, Oxygenics prevents clogging, even in the hardest water.

Bed Bath and Beyond has been selling Oxygenics showerheads for over 2 years and is currently offering the Elite™ SkinCare™ series, the BodySpa® handheld series and the new TriSpa handheld in brushed nickel, in select stores and online.

ETL, a California-based technology company, has been dedicated to building innovative solutions for today's marketplace by providing intelligent, high quality and award winning products. ETL is "Defining the Art of Innovation" by developing products that utilize the newest features and highest quality technology has to offer. They are located in Modesto, California. For more information on the products that they offer or to order direct, please call ETL® at 1-800-344-3242 or online at www.oxygenics.com.
